# BassMod 4848

The BassMod 4848 is the the most popular bass trap in the RA line. Like the entire BassMod line, the BassMod 4848 offers the highest NRC ratings in the industry at center frequency (1.1 avg.). Like the rest of the BassMod line, it also offers a wide choice of center frequencies to the user. The BassMod 4848 is designed to fit into most environments without sacrificing performance

Please review our 4848 C423 test data to determine which model best suits your project.

**BassMod Model:**  
BassMod 4848: 48" x 48" with 4" to 8" depths

The depth and other factors affect the center frequency and Q so please review all data carefully. All units are ASTM E84 Class A fire-rated and constructed of American Plywood and other fine materials. Diaphragms may vary based on model and other requirements.

**Finishes:** Fabric cover: Standard  
Painted finish also available

**Center frequencies:** 100Hz, 80Hz, 60Hz  
40Hz.

**Custom Frequencies available**  
(extra charges apply)
