BassMod 3248

The BassMod 3248 is the latest edition bass trap in the RA line.

The BassMod 3248 is designed to fit into studios, listening rooms and other environments where space may be limited.

Like the entire BassMod line, the BassMod 4848 offers the highest NRC ratings in the industry at center frequency (1.1 avg.).

Like the rest of the BassMod line, it also offers a wide choice of center frequencies to the user.

Please review our 3248 C423 test data to determine which model best suits your project.

BassMod Model:

BassMod 3248: 32" x 48" with 4" to 8" depths

The depth and other factors affect the center frequency and Q so please review all data carefully. All units are ASTM E84 Class A fire-rated and constructed of American Plywood and other fine materials. Diaphragms may vary based on model and other requirements.

Finishes: Fabric cover: Standard
Painted finish also available

Center frequencies: 100Hz, 80Hz, 60Hz
40Hz.

Custom Frequencies available
(extra charges apply)
