

RealDiff HDS

The RealDiff HDS was designed to meet the needs of customers who want great diffusion without the high cost, while still maintaining the professional look of our RealDiff line.

With a thinner design the RealDiff HDS fits into wall and ceiling structures that other phase-grating quadratics might not. The optimized cell structures offer the same high-quality diffusion you expect from all RealAcoustix products. The RealDiff HDS is available in a variety of woods and painted finishes and has the same attractive appearance of the rest of the RealDiff line of 2D diffuser. Consider the RealDiff HDS for your next project!

RealDiff HDS (Maple)

RealDiff HDS
